Department: Chemistry  
Term: Spring 2018  
Form: Chemistry - Laboratory TA Evaluation  
Instructor: Beaton Jr,Alec Angus  
Class: CHE357 Section M003 (Physical Chemistry Laboratory)  
Responses: 5 Enrollment: 6 Response Rate: 83.3%

**Comments:**

- ALEC IS AMAZING!!!!!!!!!! BEST TA I'VE EVER HAD. He is basically the whole reason I learned anything in this class.
- Alec was a great TA and I felt a lot of the ideas about the labs were well taught and more understandable when meeting with him outside of lab.
- Best TA that I've ever had. Extremely knowledgeable on the subject, I learned so much from him. I've never really had to write full lab reports this formally before, so he was extremely helpful in explaining how to do so. Left great feedback on the lab reports, so it was something that I could really learn from. It was very evident that he spent a lot of time trying to prepare the labs, since he had very little instruction from the professor. He always was extremely well prepared and answered every question I had, even on topics that were more in depth than we were studying. He also set his office hours based on when the most amount of students could attend, which was extremely beneficial. I never bothered going to office hours because the times didn't work, or the TAs were not very helpful, but I attended Alec's whenever I could.
- This TA was probably the best TA I've ever had in the chemistry department. He genuinely wants his students to learn and will do anything so that the student understand the material. He is the best TA i've ever had.
