<ul style="list-style-type: none"> You were always really nice and I enjoyed having you as a TA over the past two semesters. Has been one of my favorite TAs within the Chemistry department and still continues to be after this course. Alec was always very helpful over email, in lab, and during office hours, and I can appreciate how he not only wanted us to do well in the course, but wanted us all to actually understand the concepts behind the labs as well. Awesome, informative. Name a positive character trait and this lad has it in spades. Give him a raise. good TA Alec is probably the best chemistry TA at Syracuse. Clear about expectations and underlying chemistry behind experiments, very patient and understanding with student questions, and always willing to help. Insanely smart, but explains difficult concepts to students well - which means he really understands the material! Would be a great prof if he wanted to be one. 10/10. Alec always made time for his students and was very good at responding to emails about questions. He is one of the best TAs I have ever had. Great job, it was a pleasure having you as TA in lab. Alec responded very quickly to emails and always helped with code or Gaussian or excel whenever we needed it. I've had Alec multiple times now as a TA and he's awesome every time.
